

ROYAL CANIN Veterinary Diet®

# CALORIE CONTROL CC® HIGH PROTEIN

## Indications:

- For weight loss in overweight or obese adult dogs

## Contraindications:

- Growth
- Pregnancy, lactation

## Nutritional Differences:

### Calorie Control:

Calories are controlled to restrict energy intake and promote healthy weight loss

### High Protein:

High protein content to ensure maintenance of lean body mass during weight loss

### Nutrient Balance:

All essential nutrients are increased relative to energy to ensure nutrient requirements are met during weight loss

### Natural Preservative:

Naturally preserved to ensure freshness and quality

## Additional Differences:

- Enriched with L-carnitine to help facilitate healthy weight loss
- Enriched with antioxidants to help maintain a healthy immune system and to reduce DNA damage associated with aging

## Notes:

- The diet is formulated to promote weight loss in overweight or obese dogs and should be used as part of a weight reduction program in combination with behavioral management and, when possible, an exercise program
