

ROYAL CANIN Veterinary Diet®

MATURE WK™ NEUTERED CAT

Indications:

- Neutered male and female cats over 7 years of age
- To help avoid the onset of a pre-diabetic condition
- To help prevent calcium oxalate urolithiasis
- To help maintain joint health

Contraindications:

- Growth
- Pregnancy, lactation

Nutritional Differences:

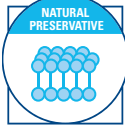

Phosphorus Control:

Controlled levels of dietary phosphorus to promote kidney health

Joint Support:

Enhanced with glucosamine and chondroitin to help promote joint health (dry only)

Natural Preservative:

Naturally preserved to ensure freshness and quality

Additional Differences:

- Increases urine volume and reduces the saturation of urine with calcium oxalate and struvite, helping to prevent the two major types of urolithiasis
- Optimal amounts of high quality ingredients to assist the aging cat's sensitive digestive system and promote ideal body condition
- Enriched with antioxidants to help maintain a healthy immune system and to reduce DNA damage associated with aging
- Enriched with a blend of soluble and insoluble fibers to help reduce digestive problems such as vomiting, constipation, and hairballs (dry only)
- Enriched with zinc, linoleic acid, fish oil, and L-tyrosine to promote skin and coat health and optimal coat color (dry only)
- Uses low glycemic index carbohydrates to help glucoregulation (dry only)
- Enriched with L-carnitine to maintain lean body mass (dry only)
