

DENTAL DS™ SMALL BREED

Indications:

- To help reduce the formation of plaque and calculus in adult dogs weighing less than 10 kg (22lbs)

Contraindications:

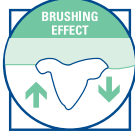

- Growth
- Pregnancy, lactation

Nutritional Differences:

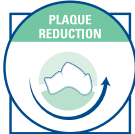

Tartar Control:

Helps to reduce dental tartar (calculus) formation through the action of sodium tripolyphosphate which binds salivary calcium, making it unavailable for the formation of calculus

Brushing Effect:

The texture and shape of the kibble produce a gentle abrasive effect on the teeth during chewing; this mechanical action provides a brushing effect to reduce the accumulation of dental plaque and calculus

Plaque Reduction:

A Royal Canin breakthrough; a nutrient that alone helps to reduce plaque formation

Natural Preservative:

Naturally preserved to ensure freshness and quality

Additional Differences:

- Supplemented with decaffeinated tea (green tea extract) for both bacteriostatic and anti-adhesion properties
- Enriched with pantothenic acid, inositol, niacin, choline, and histidine to strengthen the barrier effect of the skin
- Enriched with beet pulp and fructooligosaccharides to promote a healthy intestinal flora
- Increases urine volume to help reduce the urinary saturation of struvite and calcium oxalate
- Enriched with antioxidants to help counter the effects of oxidative stress on immune function and to reduce DNA damage
- Enriched with long chain omega-3 fatty acids eicosapentaenoic and docosahexaenoic acid (EPA and DHA)

Notes:

- Do not add water to ROYAL CANIN Veterinary Diet® canine DENTAL DS™ SMALL BREED
- ROYAL CANIN Veterinary Diet® canine DENTAL DS™ SMALL BREED should be fed as a complete meal; the efficacy when used as treats is not known

Feeding Recommendations for Canine Adult Maintenance:

Body Weight		Suggested Caloric Intake Kcal per day	Daily Feeding	
lb	kg		Grams per day	Cups per day
5	2.3	240	62	2/3
10	4.5	398	103	1 1/4
20	9.1	660	171	2
30	13.6	888	230	2 1/2
40	18.1	1095	284	3 1/4
50	22.7	1289	334	3 3/4
