

**Indications:**

- Dietary hypersensitivity (allergy) which may present with dermatological and/or gastrointestinal signs
- Dietary intolerance (lactose intolerance, wheat gluten enteropathy)
- Vomiting
- Idiopathic diarrhea
- Inflammatory bowel disease
- Idiopathic chronic colitis
- Otitis externa due to food sensitivity

Contraindications:

- Rabbit hypersensitivity
- Potato hypersensitivity
- Pregnancy, lactation
- Growth

Nutritional Differences:**Selected Protein:**

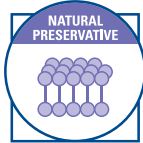

The protein in the diet is provided by potato and rabbit, which are rarely associated with adverse food reactions in dogs

**Skin Barrier:**

Optimal amounts of B vitamins and amino acids help reduce transepidermal water losses and strengthen the barrier effect of the skin

**EPA and DHA:**

Eicosapentaenoic and docosahexaenoic acids are long chain omega-3 fatty acids that promote a healthy skin and coat

**Natural Preservative:**

Naturally preserved to ensure freshness and quality

Additional Differences:

- Enriched with antioxidants to help maintain a healthy immune system and to reduce DNA damage associated with aging

Notes:

- No other protein sources should be made available while feeding ROYAL CANIN Veterinary Diet® canine POTATO & RABBIT FORMULA™ dry and RABBIT FORMULA™ can
